Dear Resident

Upcoming work in your area – Elstree to Sundon overhead electricity line upgrade

As you may be aware, we are carrying out essential refurbishment to our existing overhead electricity line between our Elstree and Sundon substations. This work involves replacing the wires and other equipment along the 35km route.

We will be shortly starting work in your area, between Friday 9 August and Friday 30 August. Please be aware that these timings can change at short notice.

The team will typically be working between 8am and 7pm.

This work will not affect local electricity supplies, and access to properties and parking will not be affected.

We'll be working in your area to replace the overhead electricity cables that run above Cheverells Close. This will include a short period of preparatory work between Friday 9 August and Wednesday 14 August, followed by replacing the wires on the overhead line between Thursday 15 August and Tuesday 30 August.

We're currently unable to provide more precise timings, as our work is complex and can be affected by factors beyond our control such as the weather. We will be using a special system that allows us to safely replace wires without lowering them to ground level to help us minimise disruption as much as possible.

During the refurbishment you may see vehicles and machinery that allow us to do the work safely, move materials and equipment onto site, remove the old equipment, and transport workers to and from the location. We'll also be displaying signage in the area to let people know ahead of the work starting.

This essential upgrade work is being carried out for us by Morgan Sindall, ensuring long-term energy security for the South of England on both our high-voltage electricity transmission network, and the local distribution network supplying homes and businesses.

If you have any queries, you can contact our Community Relations Team by calling 0800 915 3602 (9am-5:30pm Monday to Friday) and leaving a message, or by email at elstreetosundon@nationalgrid.com

Thank you in advance for your understanding as we carry out our essential work.

Yours faithfully

Chris Sandland

Project Manager, National Grid Elstree to Sundon Refurbishment Project
